

NIMBLE THIS PNM ENTERPRISE OFFERS ALL OUR GREAT

Our enterprise PNM is unique in the industry for how robust and feature rich it is. Nimble This has spent years optimizing this technology for cable operator's systems with amazing results. The summary being a drastic reduction in maintenance costs and significantly improved operational efficiencies. For additional product suite information check out Nimble This PNM suite.

PNM technology has proven to be very effective in the cable industry and will assist cable operators in being more effective in identifying impairments in their cable plant FAST by pinpointing the location on a map and so much more.

IN THIS -AT A GLANCE- PDF YOU WILL SEE THE HIGHLIGHTS IN THE MATRIX

Locates and resolve In-home or outside plant impairments before they impact operations and subscribers. Finding problems quickly with Nimble This PNM technology has resulted in lowered maintenance costs for the cable operator and better cable video and high-speed data service for subscribers. PNM has a little for everyone with a big payback. Easy to use and effective. KPI ready and built-in dashboard so management can see that their investment was worth it. If you are more interested in the financial end of it, you will really get excited about the cost savings offered to via better technology and improved network health. For those of you that are into quality control and customer satisfaction you too are covered with this technology. If you are the tech that must find the impairment on the hottest or coldest day of the year you too will embrace this technology. Imagine knowing where to go to find the impairment location on a map before you get going from the office and knowing the impairment in advance (in several cases). A wealth of knowledge at your fingertips in an easy to use application from your desktop, tablet or smart phone.

The PNM platform provides technicians with actionable information. Nimble This PNM provides clear and concise information on subscriber modems that are likely to experience problems in the near future

WHAT SOLUTION IS RIGHT FOR YOUR NETWORK?

Nimble This offers a PNM (Proactive Network Maintenance) platform with four different options:

- Nimble Upstream
- Nimble PNM Basic
- Nimble PNM Pro
- Nimble PNM Enterprise

The platform helps cable operators quickly discover and locate network impairments, lower maintenance costs, and improve broadband service. The platform's graphical map and correlation groups make it easy to identify and troubleshoot issues impacting multiple

subscribers, whether they are related to in-home or the outside plant. Nimble This offers a competitive technological advantage, ensuring that cable operators can maintain a stable, efficient, and cost-effective data network, providing the best possible service to both subscribers and operations. Contact Nimble This to let us help determine which features are needed to get your job done.

The technology offered by Nimble This enables cable operators to be proactive in managing their network and providing the best service to their customers.
